

AF66

The AF66 is a compact, compressed air cleaned filter specifically suited for outdoor setups. Different types of polyester needle felt filter bags allow for optimal filter performance in wood and plastic industries. The high negative pressure ensures that your machines perform without compromise.

Key advantages

- ATEX-compliant
- EN 12779-compliant
- Compressed air cleaning
- More filter surface – longer bag life
- Pre-separation inlet – bigger volumes
- High negative pressure for a cleaner result
- Control panel included
- Durable 3mm body
- 2-year warranty, with a maximum of 4000 operational hours

Options

- Sound damper on return air
- Flange and hopper to briquetting machine
- Frietomat machine recognition
- Inverter control for electric motor 15kW
- Raised frame and safety fence for BigBag/dumpbin

Technical Specifications

Fan motor	15kW
Air flow	11.000 m3/h
Inlet pressure	3.000 Pa
Filter area	66 m2
Filter cleaning	Automatic, online, compressed air
Waste discharge	Rotary valve
Voltage	400/380V 50 hz
Amperage (nominal, start-up)	27,7 Amp, 110 Amp
Weight (empty)	2.065 kg
Dimensions (LxWxH), max.	3.054mm x 1.600mm x 4315mm

Unit without options, in mm
