flexible GRIPPING system

safe working load: **125 - 2000 kg**

Unique gripping system to handle workpieces on a frame.

Different materials – e.g. windows, doors, glass plates, metal frames, claddings, stone slabs – can be manipulated guaranteed damage-free.

The clamping range amounts to 50-150 mm, the clamping pressure can be set. The hoisting unit is controlled infinitely variable.

The flexible gripping system is also suitable for packed goods.
